Fairyland

Through the precise melting, bending, shaping and decorating of flat glass using our own ceramic molds, we were able to create and develop production of decorative flat glass elements and products for indoors and outdoors.

The result was wide range of decorations and ornaments, figures and glass around fairy-themed.

The studio expands the collections of artistic fusing glass compositions for decorating gardens, fences, gates and interna and external walls, which gain additional charm thanks to the backlit effects.

The advantage of fusing glass is permanent color and shape – our products keep it for many years, despite the passage of time and various weather conditions. In addition, it is dimensionally stable – in contrast to many other materials such as paper or wood, glass in particular retains its unchanging character.

INDIVIDUAL AND WHOLESALE OFFER

The above products are just an example of our capabilities.

The wide range of our products and services we can offer, guarantees excellent quality as well as flexibility in the implementation of individual and wholesale orders.

We invite you – if you run a company and need a reliable manufacturer of components and hand made decorative and decorative glass products.

Our production process included not only in the production of the product itself, but also in the production of mounting brackets, tripods, medal rods as well as individual and collective packaging.
